DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks/Arguments, filed 11/10/05, with respect to the rejections of claims 14-18 have been fully considered and are persuasive. All of the rejections of claims 14-18 have been withdrawn.

Election/Restrictions

2. This application is in condition for allowance except for the presence of claims 12 and 13 to an invention non-elected without traverse. Accordingly, claims 12 and 13 have been cancelled.

Allowable Subject Matter

3. Claims 14-18 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art made of record does not teach or fairly suggest the specific location of the humidifier of the present invention. That is the humidifier connected in the coolant loop located between the heat removal means and the fuel cell stack assembly coolant region inlet, wherein the humidifier is also connected to the inlet oxidant stream. The prior art does allow for the humidifier to be in the coolant loop and is also operatively connected to the inlet oxidant stream, however it is located between the heat removal means and the fuel cell stack assembly coolant region outlet. And there is no motivation for a person of

ordinary skill in the prior art to relocate the humidifier of the prior art to the location claimed by applicants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
